Using ServiceNow® Has Never Been Easier

WalkMe accelerates ServiceNow® training and onboarding, increases productivity, and significantly reduces human-errors.

General Information

WalkMe™ is an enterprise-class, guidance and engagement platform designed to onboard users, support them in real-time, and maximize their productivity.

Think of WalkMe like a navigation system (GPS) for applications. It guides users through a series of tip balloons inside their application, showing them where to click to successfully complete tasks or processes.

Our real-time, contextual guidance capabilities eliminate the guesswork and frustration of following video tutorials or reading through FAQ pages.

WalkMe - More Than Meets the Eye

WalkMe offers much more than interactive, real-time Walk-Thrus. The platform includes additional, powerful capabilities:

- Analytics/BI engine for tracking and reporting
- Machine learning algorithm for error prevention
- User input data-validation engine
- Surveys for feedback collection and competence assessment
- Total customization to your brand’s look and feel
- API for advanced usage

Implementing WalkMe™ does not require integration or modification to the underlying application or any technical knowledge.

Schedule a demo today to see how you can use WalkMe to get the most out of your investment in ServiceNow®.

1000+ companies instantly simplify their user experience with WalkMe:

PayPal, Comcast, at&t, Virgin, Royal Canin
